

- ✓ Eugenol free
- ✓ Good flow characteristic
- ✓ Quick setting
- ✓ Reduced chair time

## xeroCem Eugenol Free Temporary Cement

Totally Eugenol-free cement based on zinc oxide and EBA. It gives a smooth and creamy consistency.

A contemporary eugenol-free, zinc oxide-based temporary luting cement. The material mixes reliably every time to a smooth, creamy consistency. The material is radiopaque with a low film thickness and will not inhibit resin polymerisation (light cure or self cure).

### Indications

Temporary cementing of provisional crowns and bridges inlays and onlays

### Features

- Eugenol free
- Good flow characteristics
- Quick setting
- Easy removal of set cement
- Low film thickness
- Radiopaque

### Benefits

- No sensitivity or allergy issues
- Restoration seated easily and evenly
- Reduced chair time
- Prevents seepage & retains restoration
- Quick prep prior to final cementation
- Will not inhibit adhesion of resin materials
- Good marginal adaptation
- Show on X-rays

Available in	Code
1 x 40gm Base paste & 1 x 20gm Catalyst paste	AH1051
